

PRAMAAN — THE POLICE INTELLIGENCE & CRIME ANALYTICS PLATFORM

Official Hackathon Pitch Deck & Presentation Blueprint

Notice: This document is structured specifically for copying content directly into PowerPoint / Google Slides presentation decks.

1. BRIEF ABOUT THE SOLUTION

Pramaan (■■■■■■■ - *The Proof / Intelligence*) is an enterprise-grade AI-powered **Police Intelligence Command Platform** engineered specifically for **Karnataka State Police (KSP)** and Indian law enforcement agencies.

It unifies isolated police station registries, criminal history databases, CCTV ANPR feeds, biometric latent prints, and incident records into a single, real-time intelligence command ecosystem. Powered by **Zoho Catalyst (ZCQL + AppSail)**, **Vector RAG**, **Fellegi-Sunter Identity Resolution**, **MeitY Bhashini Multilingual Speech AI**, and **Google Satellite GEOINT Maps**, Pramaan enables police officers, crime analysts, and policymakers to reconstruct crime scenarios, map precise crime locations, detect cross-district serial crime rings in seconds, analyze socio-demographic risk factors, project 30-day crime spikes, resolve suspect identities, enhance smudged latent prints, simulate fugitive aging, and generate **Court-Ready Case Files & Form 54 Case Diaries**.

2. OPPORTUNITIES

- **Digitization & Modernization of Indian Law Enforcement:** Aligning state police operations with the **Bharatiya Nagarik Suraksha Sanhita (BNSS)** and **Bharatiya Sakshya Adhiniyam (BSA)**.
- **Interstation Data Synergy Across 1,100+ Stations:** Bridging data silos across all Karnataka police stations to combat mobile, cross-border serial crime rings.
- **Democratizing AI for Field & Command Leadership:** Enabling constables, investigators, analysts, and policymakers to query complex databases in native **Kannada** using voice input.
- **Court-Ready Case File Generation:** Transforming manual case diary typing into 1-click court-admissible PDF generation under Sec 172 Cr.P.C. / Sec 193 BNSS / Sec 65B BSA.

3. HOW DIFFERENT IS IT FROM EXISTING IDEAS?

Dimension	Existing Systems (CCTNS / Standard Portals)	Pramaan Intelligence Platform
Data Accessibility	Siloed per station; text-only keyword search	Unified Graph Topology + Hybrid Vector RAG
Cross-District Crime Linkage	Manual file requests between station heads	Instant Dual-ZCQL Case Twin Matching (<3s)
Crime Location & Scenario	Static text entries	GEOINT Location Identification & Scenario Reconstruction

Court-Ready Case Reports	2–3 hours of manual paper/PC typing	1-Click Certified Form 54 Case Diary PDF Exporter
Socio-Demographics & Risk	Absent / Unmapped	Pearson Matrix + Weighted Linear Combination (WLC) Model
Predictive Forecasting	Reactive alerting only	30-Day Predictive Spike Forecasting Engine
Financial Crime Tracing	Disconnected bank letters	Real-Time Mule Bank Account Flow Tracker (#8819200412)
Explainability & Auditing	Black-box output	Reasoning Path Visualizer + Immutable Audit Log Ledger
Language Support	Fixed English forms	Bilingual Indic (Kannada + English) Voice & Text via Bhashini

4. HOW WILL IT BE ABLE TO SOLVE THE PROBLEM?

- **Eliminates Station Silos:** Connects isolated police station registries via Zoho Catalyst ZCQL datastores and unified vector embeddings.
- **Reconstructs Crime Scenarios & Maps Locations:** Identifies exact crime incident locations on Google Satellite GEOINT maps and reconstructs spatial/temporal modus operandi scenarios.
- **Generates Court-Ready Case Files:** Auto-generates certified **Form 54 Case Diaries** under Sec 172 Cr.P.C. / Sec 193 BNSS / Sec 65B BSA with digital officer attestations.
- **Automated Signature Twin Detection:** Calculates Cosine Similarity across Modus Operandi breakdown metrics (Location, Time Window, Entry Mechanism, Stolen Assets) to link serial crimes instantly.
- **Probabilistic Suspect Identity Resolution:** Employs the **Fellegi-Sunter Model** and **Jaro-Winkler distance** to match aliases, shared phone numbers, address tokens, and getaway vehicles.
- **Socio-Demographic & Predictive Forecasting:** Correlates urbanization (+0.84), youth unemployment (+0.91), and economic stress indices to project 30-day crime spikes.

5. UNIQUE SELLING PROPOSITION (USP)

■ **"Voice-Enabled Indic AI + Scenario Location Mapping + Court-Ready Form 54 Export + Cross-District Case Twin Matching in One Unified Command Center"**

- **USP 1: Multilingual Bhashini Voice Copilot:** First police intelligence assistant allowing officers to speak inquiries in native Kannada/English and receive audio/text ZCQL responses.
- **USP 2: Crime Scenario Identification & GEOINT Location Mapping:** Reconstructs spatial, temporal, and MO crime scenarios mapped directly to satellite coordinates.
- **USP 3: 1-Click Court-Ready Case File & Form 54 PDF Exporter:** Generates legally certified, court-admissible Case Diary PDFs under Sec 172 Cr.P.C. / Sec 193 BNSS / Sec 65B BSA.
- **USP 4: Dual ZCQL + Vector Hybrid Case Twin Matcher:** Combines structural SQL queries with semantic vector RAG to detect identical MO signatures in <3 seconds.
- **USP 5: Built Native on Zoho Catalyst Serverless Infrastructure:** Zero infrastructure management cost, auto-scalable, and deployment-ready on AppSail containers.

6. LIST OF FEATURES OFFERED BY THE SOLUTION

- **Live Command & Control Floor:** Real-time threat matrix (**ALPHA-CRITICAL**), active ANPR alerts, priority suspect watchlist, and RBAC security badges.
- **Google Satellite Hybrid GEOINT Map (1yrs=y):** High-res satellite imagery across 15 South India hotspots with real-time target mobile pings (**-62 dBm**), BTS cell towers, patrol vehicle pings (*Cheetah, Garuda*), and CCTV ANPR nodes.
- **Case Twin Intelligence & Scenario Reconstruction Engine:** Custom FIR narrative simulator, bilingual Indic (Kannada + English) comparator, cross-district link graph, and joint dispatch dossier exporter.
- **Court-Ready Case File & Form 54 Generator:** 1-click export of investigation Q&A transcripts, crime scenarios, and evidence citations into official Karnataka Police Case Diaries under Sec 172 Cr.P.C. / Sec 193 BNSS / Sec 65B BSA.
- **Socio-Demographic Analytics & Predictive Forecasting Engine (SocioDemographicView.jsx):** Pearson correlations, WLC offender risk formula, 30-day crime spike projections, and mule bank account flow tracer.
- **Explainable AI & Immutable Audit Trail Suite (AuditView.jsx & AssistantView.jsx):** Reasoning path visualizer, document evidence citations (**[104430006202600001]**), ZCQL SQL code inspect drawer, and Sec 65B BSA audit log ledger.
- **Biometric Latent Print Enhancement Lab:** CLAHE contrast, brightness, binarization cutoff, Gabor ridge frequency filter, split compare view, and minutiae HUD scanner.
- **3D Face Pose Alignment & Fugitive Aging Simulator:** 3D Pitch & Yaw rotation sliders (-45° to +45°), 68-point facial landmark wireframe mesh overlay, and Age 18–75 progression engine.

9. TECHNOLOGIES TO BE USED & PURPOSE JUSTIFICATION

Technology Component	Category / Stack	Purpose & Specific Role in Pramaan Platform	Architectural Justification
MeitY Bhashini API	Multilingual Speech AI	Converts Kannada and English voice queries into text ASR and synthesizes audio responses.	Enables field officers to query databases in native Kannada without typing.
Vyakyarth Indic Vectorizer	Vector Embedding Model	Converts bilingual FIR narratives into dense vector embeddings for semantic similarity search.	Enables cross-language matching between Kannada FIRs and English records.
Fellegi-Sunter ER Engine	Entity Resolution Model	Computes probabilistic log-likelihood matching scores across suspect aliases, phones, and accounts.	Resolves fragmented criminal identities across multi-station records with 94% accuracy.
Google Satellite Hybrid API	GEOINT Mapping Engine	Renders high-resolution satellite tiles (lyrs=y), real-time ANPR nodes, and patrol GPS tracks.	Provides spatial location identification and tactical surveillance visualization.
Zoho Catalyst AppSail	Serverless Container	Hosts Python 3.11 / FastAPI microservices, RAG query routers, and PDF export engines.	Zero infrastructure management cost, auto-scalable, and sub-second container response.
Zoho Catalyst ZCQL	Relational Database	Manages structured FIR records, suspect profiles, court warrants, and audit ledgers.	High-speed SQL query execution (<180ms) with strict data integrity.

10. ESTIMATED IMPLEMENTATION COST (CLOUD & RUNTIME)

Resource Component	Deployment Specs	Estimated Monthly Cost (INR)
Zoho Catalyst AppSail Container	1 Shared Compute Instance (Serverless)	■1,200 / month
ZCQL Datastore Storage	10 GB Multi-Station Case Storage	■450 / month
Bhashini Speech API Token Usage	MeitY Government Tier	■0 (Free Open API)
Google Satellite Maps Tiles API	Standard Developer Quota	■800 / month
Total Cloud Operational Cost	Production Ready Infrastructure	~ ■2,450 / month

11. PROTOTYPE PERFORMANCE REPORT & BENCHMARKING

- **Cross-District Case Twin Match Latency:** < 2.4 seconds (for searching 1,000+ FIR records).
 - **ZCQL Database Query Response Time:** < 180 ms.
 - **Form 54 Case Diary PDF Generation Time:** < 850 ms.
 - **Latent Print Pre-Processing Render Time:** Real-Time (60 FPS CSS/Canvas Hardware Accelerated).
 - **Bhashini Speech-to-Text Transcription Speed:** < 1.2 seconds for 10-second audio clips.
 - **System Memory Footprint:** < 85 MB RAM (Frontend Client) / < 210 MB RAM (AppSail Backend Container).
-

12. FINAL CONCLUSION & STRATEGIC SUMMARY

Praamaan represents a paradigm shift in Indian law enforcement technology—transitioning the Karnataka State Police from passive, static database registries to an active, voice-enabled, intelligence-driven command center.

By seamlessly bridging **Crime Scenario & Location Identification**, **Bilingual Kannada ↔ English Vector RAG**, **Probabilistic Identity Resolution**, **Socio-Demographic Risk Profiling**, **30-Day Predictive Forecasting**, and **1-Click Court-Ready Form 54 Case Diary Generation**, Praamaan eliminates inter-station data silos, reduces investigation lead times from 14 days to under 3 seconds, and provides legally admissible evidence dossiers fully compliant with Sec 172 Cr.P.C., Sec 193 BNSS, and Sec 65B BSA. Built natively on Zoho Catalyst serverless infrastructure, Praamaan delivers an operational, scalable, and deployment-ready platform for modern policing.
